

BabybugTM

Baby Carrier

HOW TO ASSEMBLE

Step-1

Place the baby carrier inward and fold it with reference to the dotted line (As shown in image A).

Step-2

Once it is folded, connect G1 & G2 through C-1 and C-2 (As shown in image B).

Step-3

Now fasten the buckle in front (As shown in image C)

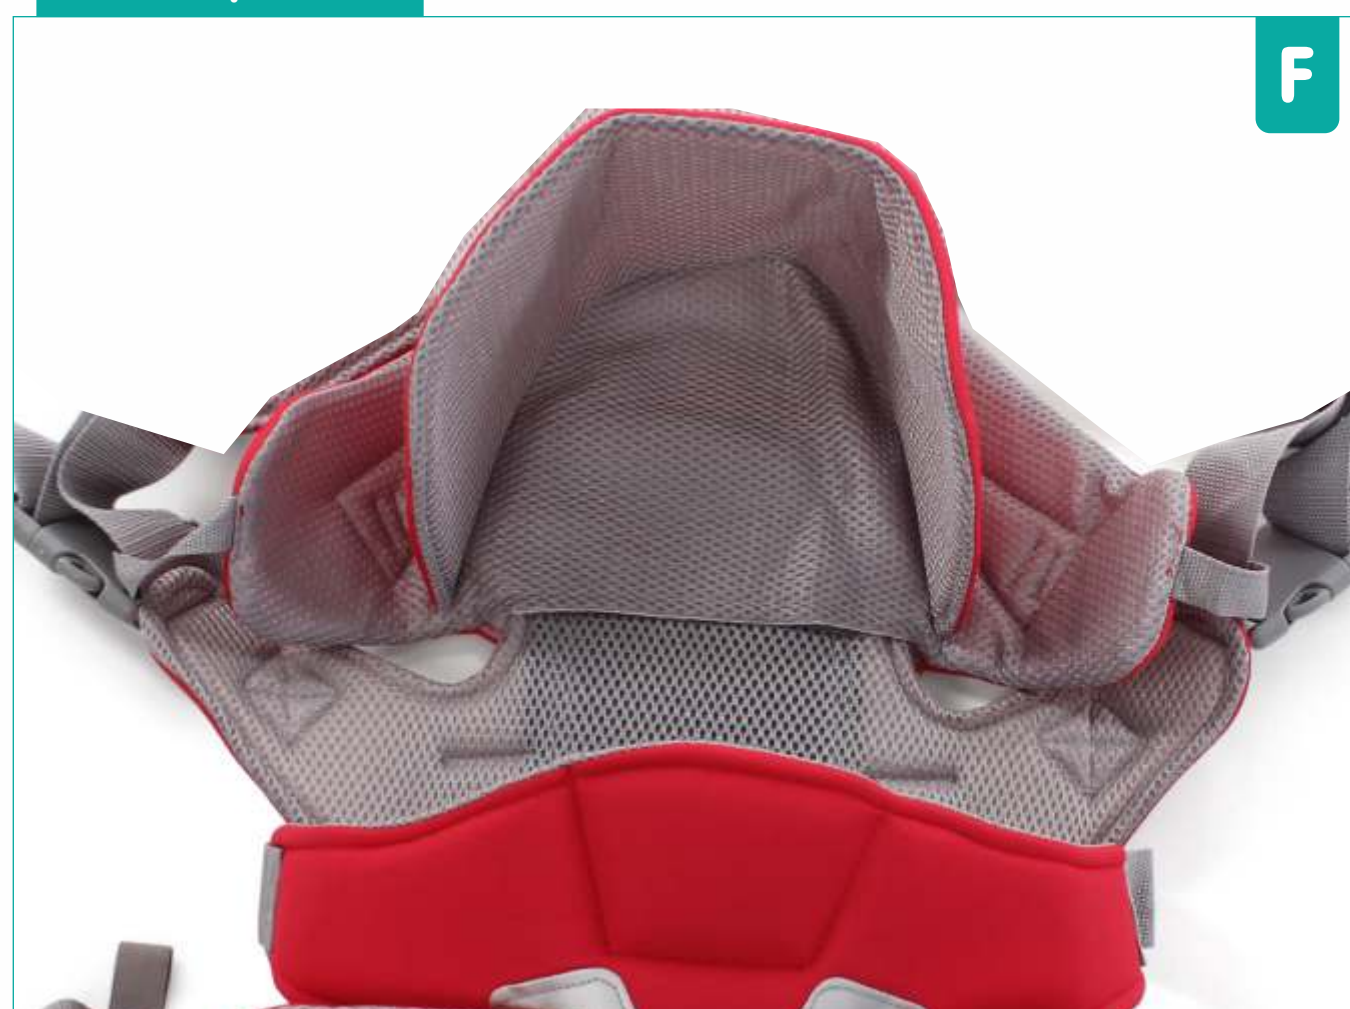

Step-4

Attach strap D through F and also B – 1 and B – 2 for head support (As shown in image D & E)

Step-5

Head support is attached to the baby carrier through Velcro which is placed at the back of the carrier (As shown in image F)

Step-6

To carry your baby sideways, carrier must be fitted well on the person who is going to wear it. Then secure the shoulder strap, connect **K-1** to **E-1** through **A-1**. Tighten the strap as needed and follow the same step for other side.

Note: New Born babies need head rest which provides support to their tender heads.
