Important-keep For Reference-read Carefully

You should read the instructions carefully before using the cot.

The product outline in this manual is for assembly and operation purposes. On occasion the physical product might differ from the product outline shown on account of constant improvements being made to the product for enhanced customer experience.

Parts Name

Instructions For Assembly And Use

Assemble the fixed guardrail and two headboards with 5pcs M6*40 hex socket bolts

Assemble the front guardrail and two headboards with 4pcs M6*40 hex socket bolts (1) Fixed headboard

As depicted in the picture the 4 iron bed supporters are screwed into the fixed guardrail and embedded nut in front guardrail. (attention: Please ensure that the supporters are attached firmly to prevent the bed from falling)

Place the bed board on the 4 iron bed supporters and keep it flat and steady

Fold up the extension headboard and front frame. The extension headboard should be attached firmly using the Rotary bolt M6*40. The Bed board should be assembled using the bolt M6*40. Push the caster wheels into the receiving cylinder of the leg to attach them firmly in place

As shown in the picture assemble the 3 tiered shelf with 12 nos M6*35 bolts. Then assemble the shelf and fixed side frame with 4 nos M6*40 bolts

Cradle Assembly

front frame and back frame + bed board for cradle

left side frame

right side frame for cradle

M6*35 bolt

Cradle Assembly Steps:

1. Assemble the cradle with 8 nos M6*35 hex socket bolts as shown in the picture
2. Fix the cradle on the guardrail for as shown in the picture

To Assemble The Mosquito Net

As shown in the picture on the left, use 2 nos M6*28 rotary bolts to pass through the 2 holes of the mosquito net rod and fix in the corresponding embedded nut which is in the middle vertical bar on the reverse side of the fixed guardrail. Fix the mosquito net loop into the tip of the mosquito net rod and open the mosquito net to cover the cot.

How To Lengthen The Cot And Use The Side Rail

Open the front guard rail:

Turn the connector to the horizontal position to drop the movable guard rail (please note: that movable guard rail is part of the front guard rail). When the movable guard rail is opened the baby cot can be combined with the adult bed.

To lock the Guard Rail:

Do the above steps in reverse sequence to finish locking the front guard rail.

Lengthen the Cot:

First open the movable rail as per the process outlined above. As depicted in picture A, remove the rotary bolt used for fixing the extension head-board. Lay down the extension head-board to finish increasing the size of the cot as shown in picture B.

Picture A

Picture B

Fold back the lengthened Cot:

Do the above steps in reverse sequence to fold back the lengthened cot to its previous size.
