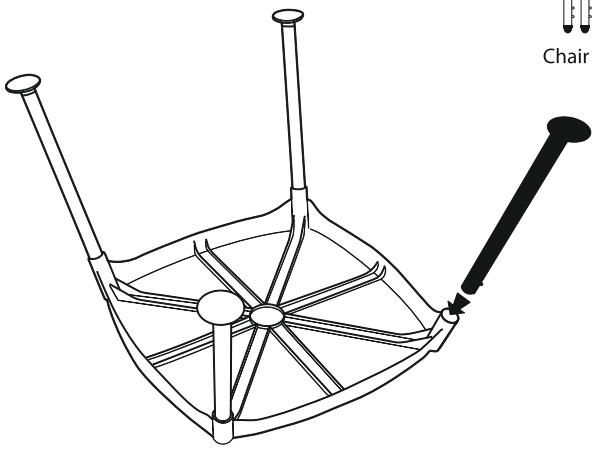

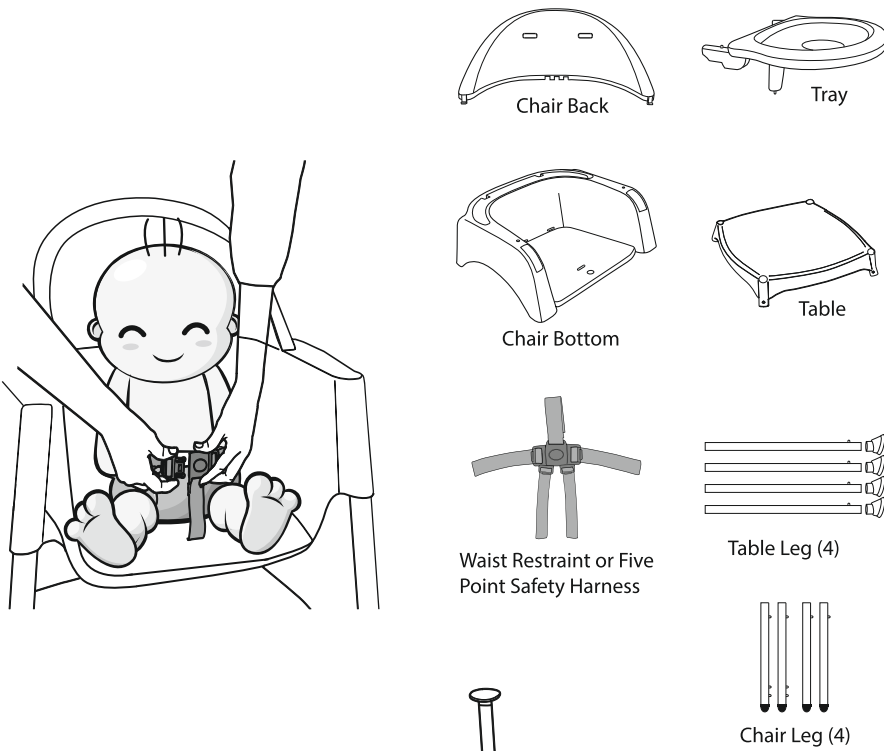

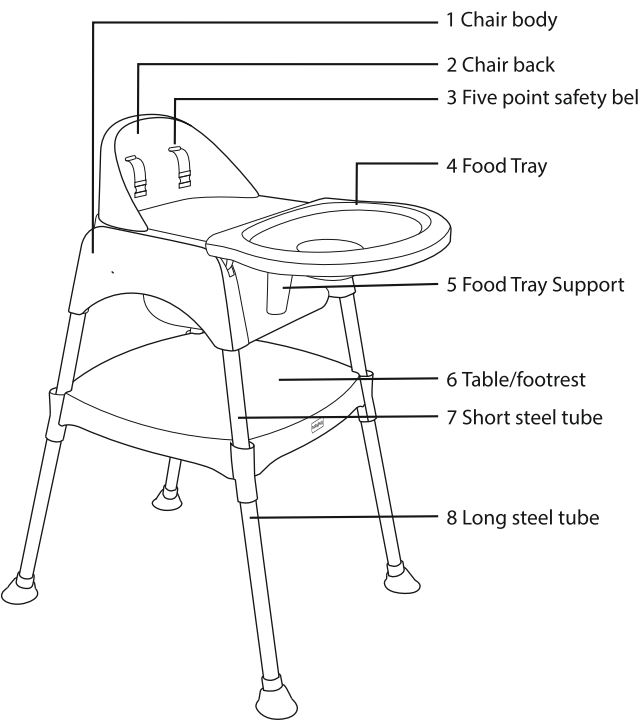

Figure 1

### Table Assembly

As shown in **figure 1**, turn the table top upside down and insert the table legs or long steel tubes into the holes provided on the underside of the table till you hear an audible "click" sound. Check that the snap hooks on the table legs are protruding through the snap holes on the table.

### Chair Assembly

As shown in **figure 3**, turn the chair base upside down and insert the chair legs or short steel tubes into the holes provided on the underside of the chair till you hear an audible "click" sound. Check that the snap hooks on the chair legs are protruding through the snap holes on the chair.

As shown in **figure 4**, push down the chair back into the slot provided for it on the chair. Push till you hear an audible click. Pull the chair back upwards to ensure that it has been properly installed.

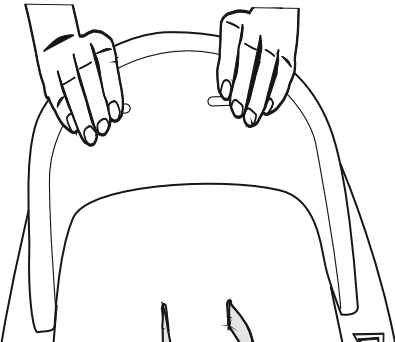

Figure 4

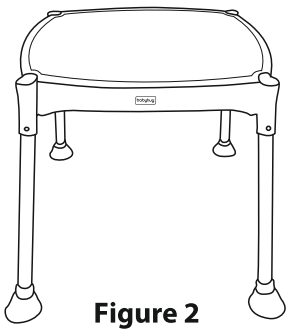

Figure 2

As shown in **figure 2**, insert the anti-skid caps on to the table legs or long steel tubes. Make sure the anti-skid caps are properly aligned to the floor so as to ensure maximum security.

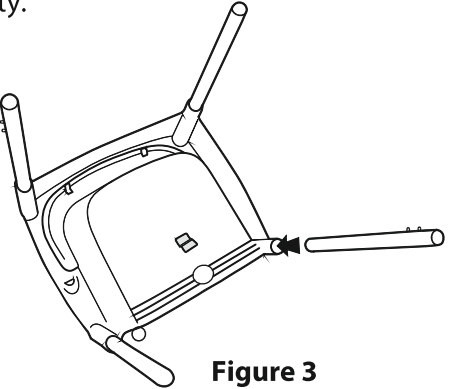

Figure 3

### Cushion & Harness Mounting

As shown in **figure 5**, take off the safety clip on the safety harness before installing the cushion and harness on to the chair. Insert the harness through the holes provided for it on the bottom and on the back of the chair. Re-insert the safety clip to complete the safety harness assembly.

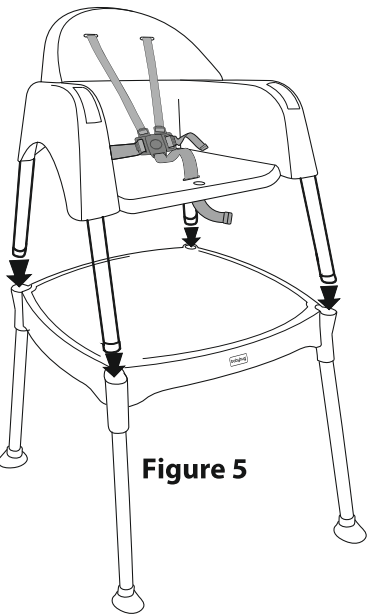

Figure 5

### High Chair Assembly

The chair has to be put on top of the table to convert the chair and table into a high chair ensure that the front of the chair and the front of the table are facing in the same direction. Put the chair legs or long steel tubes into the holes on top of the table and push till you hear an audible "click". Check to confirm that the snap hooks on the lower part of the chair legs are protruding through the snap holes on the upper part of the table.

### Food Tray Assembly

As shown in **figure 6**, insert the high chair tray at an angle of 30 to 45°. Maintain the same angle while removing the tray

As shown in **figure 7**, always ensure that the spring clip on the support bar of the tray enters the slot provided for it on the chair properly while mounting it. Otherwise the tray will be unstable.
